John Barnes, Charge Nurse, LD Short Breaks I really enjoy human interaction every day - with colleagues, patients, relatives. Good communication skills are key. Laiqaah Manjra, business administrator I went from apprentice to business administrator - the NHS really supports staff development. Ellie Pratt, Community Information Officer I like being able to help both staff and service users. It's really rewarding. Liam Capel, Nursing Associate I have developed so many new skills over the years while working in the NHS, from healthcare assistant to care assistant. Daxa Mangia, mental health nurse, The Willows I really enjoyed my work, helping people recover - I can't imagine doing anything else. You want to join our family? We're always looking for the best. Impress your career with LPT. Work at LPT We have four core values: compassion, respect, honesty, trust. Our value This monthly award is all about recognizing members of staff who have gone the extra mile. Our values - Intrusion testing and website certification services - Accredited ethical hacking - Audit expert in certified information systems - Expert in auditing certified information systems - Goodwill Hacking; support for local charities - Secure email services - VOIP phone systems - Secure chat service Implementation ofPathway referrals SystemI Leicestershire Health Informatics Service (LHIS) Service Desk provides one contact point for more than 18,000 users for all service requests, recording, monitoring and resolving cases, problems and faults. Our ITIL-qualified service development team can support and improve your organization by reviewing service processes, documenting and analyzing requirements. We build, develop and support tailored, cost-saving and time-saving clinical systems and tools designed specifically for GPs and doctors. We develop a variety of clinical systems from patient referral systems to mobile and tablet applications that can be delivered during diagnosis or referral. As fully accredited security professionals, we are able to view and test networks, and applications to ensure best practices, highlight and eliminate vulnerabilities and vulnerabilities that could lead to leakage of information or damage to the brand and reputation. Leicestershire Health Informatics Service (LHIS) can work with your organisation to facilitate the design and delivery of an effective IM&T training strategy and solution tailored specifically to ensure that your staff's personal development is aligned with the organisation's business goals and core values. Service Desk, which specialises in healthcare and clinical systems, responds to between 8,000 and 10,000 calls each month while managing IT infrastructure for more than 400 buildings nationwide. We provide dedicated and high-quality support to your organizations and businesses. If you have ANY IM&T requirements or ideas, please contact us today. We are an experienced and technically skilled team that is here to guide you through the complex and sometimes scary world of cybersecurity. Whether you want to check your system to ensure the security of your data or perform intrusion testing on a secure website, LHIS IT Assurance is here to help. We're accredited by Tigerscheme. We also operate within the administrative frameworks of other penetration and safety auditing bodies, such as: Certified Information Systems Auditor (ISACA), Certified Ethical Hacker (EC-Council), Certified Forensic Investigation Analyst (CFIA), Certified Wireless Security Analyst (CREST). At LHIS, we pride ourselves on our ability to use the latest available technology to help our customers make improvements and efficiency in their organization or customer! As is now the case with the apps we deploy at Apple and the Google Play Store, mobile app technology can be used for many things, from simplifying and improving your business to getting into standard operations like patient communication and training, such as setting up wireless usability. Leicestershire Health Informatics Service (LHIS) is a mature Data Management & Technology (IM&T) provider for services and solutions from more than 80 customer organisations while supporting IT infrastructure for more than 400 buildings across the UK. Leicester Health Informatics Service (LHIS) provides clinical system support services to organisations across the UK. We offer a range of clinical support systems such as SystemOne, PRISM, EmisWeb, RIO, Tiara & HISS. LHIS also offers electronic patient register applications (EPR) & patient management systems (PAS). The App Support service manages and maintains a variety of products that staff use to achieve, improve, or achieve their business goals. In addition to designing and developing IT training strategies and courses, LHIS is able to offer exercises for you in both clinical and non-clinical conditions. As LHIS is an accredited Education Department of the Institute for Learning and Performance (LPI), we are able to provide training; all our trainers are evaluated annually through LPI training, Monitoring & Evaluation programme to ensure consistent quality and performance. Read more The secure N3 hosting network is a WAN (Wide Area IP Network) that securely connects many different sites across the NHS. All NHS Trusts in England & Scotland are connected to a secure N3 network and is the only infrastructure used by these organisations for the safe use of web applications. That's why the majority of healthcare software providers that provide services on the NHS and in the public sector choose to use their apps on the N3 network. Read more Project to improve patient care using capacity with the best possible help Leicestershire Partnership NHS Trust (LPT) District Nursing teams have been nominated for the prestigious Nursing Times Awards. Nurses and managers from LPT who were supported by... READ MORE Kent County Council - Care Navigator App How iterative approaches can enable faster and smarter work In 2017/18, NHS Leicestershire Health Informatics Service developed a mobile app for Kent County Council (KCC) to help them get real-time feedback from customers interacting with care navigation services in the county's 12 boroughs. Here, they discuss how they have developed the app and how it works in practice. In 2017, Kent County Council decided that... READ MOREPRISM product - The opportunity to find a wide range of resources and instructions, all located in one IT system that can be accessed right away, is long overdue - and very welcome! PRISM access has streamlined my referrals on the 2-week waiting route. I know I'm sending a patient to the right service with the right information. As we add resources to PRISM, I am confident that this will make life easier for a busy GP, and as a result patient care will benefit. The patient is seen at the right clinic for the first time with the right clinician and everyone benefits. The team listened to the demands, took time to understand the national and local requirements needed to capture the appropriate feedback. We had early design meetings to make sure we were satisfied with the display and operation of the app. The introduction of the app in the services received very comprehensive support and understanding from the team, great communication about updates, technical problems, user errors and general surveys. As a service, we have made changes to questionnaires throughout the process and these changes have been managed quickly and efficiently. On-site teams have also benefited from the team's fantastic support when they've had queries with the app and devices. The database behind the app has also improved the efficiency of compiling feedback. Working with Sarah, Kerry, Mo and Rachelle from HIS has been a great collaboration, and I've learned from them and experience. Sara Lowe, CHS patient experience and CHS Governance team I am very impressed Support and quality of the work provided by LHIS. They were very friendly and approachable in addition to their high professionalism throughout the project. The team is highly motivated, dynamic and enthusiastic and crossed its limits in completing tasks and staying within the project deadline. they were quick to change/update the content based on expert suggestions and participated with doctors in the design and development of the app. They helped with project management, i.e. writing a proposal, strategic planning, approval process, and researching publicity and awards. More importantly, LHIS was heavily involved in marketing the app to various healthcare organizations, introducing itself at various academic conferences and producing leaflets. My special thanks go to Sarah Osti, who is leading the project on behalf of LHIS, Kerry Cyster and Gemma Clayton. All their contributions led to the app being named pen (Patient Experience Network) National Awards in March 2016. I wish LHIS a lot of success and recommend them to anyone considering developing similar applications. the quality and professionalism of the entire LHIS team that helped with the YOD app. They were very friendly and approachable. The team is highly motivated and enthusiastic and would cross its limits in completing tasks. Although it was a new project for us doctors and them to work in such an area, they quickly understood my clinical needs, they participated in patient and treatment sites to improve the app, changed and updated content based on expert suggestions, and were good team players to work together on designing and developing the app. More importantly, LHIS massively supported the marketing of the app, presentations at various academic conferences and brochures/brochures. My special thanks go to Sarah Osti, the service delivery manager who is leading the project on behalf of LHIS; Kerry Cyster, Product & Customer Support Officer, for design and strong quality control; and Gemma Clayton, Business and Marketing Manager, for translating/editing videos and improving overall design, making it user-friendly. I wish the LHIS team Dr Latha Velayudhan MBBS, DPM (Psy), DNB (Psy), MD (Res),Senior Clinical Lecturer (Hon), Senior Clinical Lecturer in Senior Clinical Lecturer (Hon), Institute of Psychiatry, Psychology and Neuroscience, Kings College London Reader (Hon), University of LeicesterThis comes with appreciation with the ECT application you and colleagues have developed. It is comprehensive and the availability of written, visual and audio data is very useful. I also think that information for professionals, if the patient reads it, is not frightening , which allows ect to be destigmatized and seen as a medical procedure that we Seriously. I am the only accredited ECT psychiatrist for this area where I work in Australia and recently managed to get more consultancy time for ECT, which allows me to streamline the service and train renants. In a service that did not have trained ECT nurses, we now have them and the nurse ward is useful there. I see this app as a useful resource and I see my team using it. I wish you the best and congratulations to you and your team. Anila Jacob, CMC Vellore A trained psychiatrist would like to thank an employee of Leicestershire Health Informatics Service for solving all the problems with the laptop. Colin came to Whitwick last week (the same day I called). He was so helpful and sorted out a lot of problems. More importantly, as far as I'm concerned, he never once made me feel completely incompetent! He is friendly, competent, patient and has a good sense of humour! I hope you recognize him by looking at last week's call log. He really deserves a customer service award. Sharon Gregory, administrator of Health VisitorYsi IT accounts, has provided us with fast, efficient and effective support, not only over the past year, but as long as I've known her. He is firmly polite, cheerful and approachable – remarkable qualities for those of us who are less than experts and highly valued. Needless to say, his advice and expertise are accurate and reliable and this, added to his admirable attitude, makes him a staff member leicestershire Health Informatics Service should be proud. Julie Glover, Resource Manager We use cookies: Read more. More.
